Front-end:

- HTML, CSS/SASS, JavaScript, Typescript, ReactJS, Redux, Material UI, React Native, Responsive.

Backend:

- NodeJS, MySQL.

Other:

- Git, PostMan, RESTful API.

Language:

- Writing and reading English skills.

EDUCATION

- 09/2019 - 06/2023
University of Technology UTE, - Major: Information of technology.
- - GPA: 3.27/4

EXPERIENCE

- 12/2022 - 02/2023
Internship at CTCP Giai phap va cong nghe DANATEQ
 - Contributed to the development of "Xay dung he thong quan trac moi truong Da Nang" and "Camara Cong an Hoi An" projects as a Frontend Developer, using React (Typescript) and Material UI.
 - Successfully implemented React-Google-Maps library to query and display vehicles violating traffic regulations in the "Camara Cong an Hoi An" project, enhancing the project's functionality and user experience.
 - Collaborated with team members including Backend Developers and Designers, to deliver high-quality software products.

PROJECTS

- 03/2023 - 06/2023
1. Website tim kiem viec lam tren toan quoc
 - **Project source:** <https://github.com/sybuivan/tim-kiem-viec-lam-frontend>
 - **Technologies:** React Typescript, Material UI, Redux-toolkit, Socket.io, NodeJS(express), MySQL.
 - **Features:** The website provides various features for job seekers, including the ability to create an account and log in, save job listings, follow or unfollow employers, submit job applications, communicate with employers via messaging, and receive notifications from employers.
- 07/2022 - 09/2022
2. Website instagram clone
 - **Project source:** https://github.com/sybuivan/Instagram_PrJ
 - **Technologies:** React(hook), MUI, Redux-toolkit, NodeJS(Express), MongoDB.
 - **Features:** This project allows users to securely create accounts, edit their profiles and upload photos. Users can view and interact with content posted by others, search for other users, follow or unfollow them, and manage their own followers and following lists.
- 04/2022 - 05/2022
3. Website mona shop
 - **Project source:** https://github.com/sybuivan/mona_shop_rjs
 - **Technologies:** React(hook), MUI, Redux-toolkit, CSS(SASS), NodeJS(Express), MySQL.
 - **Features:** The pet shop website allows users to login or register an account, browse and search for available pet products, add desired products to their cart, remove items if necessary, and securely checkout to purchase their selected products.
